Embroidery Scissors.....	3-J, 5-B, 5-E				

## A WORD ABOUT CLAUSS CUTTING TOOLS . . .

Shears and scissors used for cutting operations on production lines **have** to be better than those generally sold for home use. In the home they cut "once in a while," but in industrial use they often cut every day, all day.

Clauss specializes in production-line cutting tools, and makes them "the hard way" for good reason. Clauss shears are not "cast" because that would make them too brittle. They are not "cold forged" because that makes them too soft inside. They are not "inlaid blades" because they bend too easily, and can get out of adjustment if they are dropped.

Instead, Clauss makes their cutting tools by Hot Hammer Forging special cutlery steels that harden tougher, can be edged finer, and hold cutting edge longer. Handles and blades are one solid piece of rugged steel, and they are held together with specially-made tapered steel screws, pressure-seated to hold their adjustment permanently. Plating is full, heavy coverage for maximum rust protection.

All of this extra quality you get in Clauss cutting tools is hidden — until they are put to work on production operations. Then it shows up fast — in lower maintenance cost . . . more efficient cutting . . . and longer tool life. When they are selected for home or professional use, these facts mean extra value.

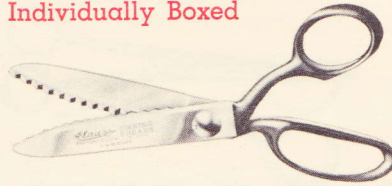

## PINKING SHEARS

CLAUSS Pinking Shears are completely chrome plated for protection against rust. The chrome gives added hardness and durability to the teeth for longer lasting sharpness. Deeper cut teeth give a larger, more indented pink for better protection against ravelling, particularly on rough, loosely woven fabrics. Large comfortable handles, even on the smaller model, and smooth effortless performance makes them a favorite in industry, among professional dress-makers, and in the home.

If ever your Pinking Shears require re-adjustment or resharpener they must be sent to the factory where special machinery for the purpose is maintained.

## IMPORTANT — READ CAREFULLY

**Orders:**

1. All orders are subject to prices in effect when shipment is made.
2. All orders for less than \$25.00 at invoiced value are subject to a \$2.50 Service Charge.
3. Distributor orders are filled **only** for standard pack quantities or multiples of standard pack quantities.
4. Drop Shipment orders will be accepted and shipped subject to a 10% charge for this service—shipment to governmental agencies excepted.

**Freight:**

Most favorable rate allowed within Continental United States (Alaska excluded) on orders for \$250.00 or more in one shipment. Orders for less than \$250.00 in one shipment F.O.B. Fremont.

**Returns:**

1. No returns will be accepted unless prior authorization has been granted by the factory, and the return is made on a prepaid basis.
2. The value for credit of any return will be established at the lower of either the prevailing price or the price at which the goods were sold less a 5% handling charge, less any costs necessary to recondition, and less any outgoing freight charges formerly paid by the company on the returned goods.
3. No returns will be allowed on any items not shipped from the factory within the preceding 12 months.

**Guarantee:**

All Clauss products are fully guaranteed against defects in workmanship or material.

**Terms:**

2% 10 days, net 30 days, from the date of invoice.
